The data in this report comes from the APD record management systems (CJIS and ICIS). Rapes are not included. The Tactical Crime Analysis Unit does not make any correlation between the report incident address and any privately owned property. Reporting personnel enter the report address on the incident report. The report narrative should be read to determine whether the crime occurred in the public right of way, public property, or private property. The data is mapped based on the street address and is updated with a neighborhood boundary that the point falls within. The neighborhood boundary file is provided by the City of Atlanta. Some geographic areas within the City are not part of a neighborhood boundary. The data presented is unofficial management statistic and is subject to change over time.
